Education

University of South Florida (USF)

Master of Science in AI & Business Analytics

- Relevant Coursework: Machine Learning, Data Visualization, Advanced Database Management, Cloud Architectures

Tampa, FL

May 2026

GITAM University

Bachelor of Technology in Computer Science and Engineering

Visakhapatnam, India

May 2022

Experience

Data Analyst Intern

May 2025 – Present

Orlando Utilities Commission (OUC)

Orlando, FL

- Spearheaded the "BAC Internal Control Project" by consolidating and analyzing 1,100+ legacy Cognos reports to identify key metrics for Billing and Collections.
- Designed and deployed interactive Power BI dashboards to the Power BI Service, configuring scheduled refreshes and managing workspace access for leadership.
- Optimized complex Oracle SQL queries to generate ad-hoc daily reports, tracking billing anomalies and unprocessed adjustments to ensure financial compliance.
- Collaborated with the Billing QA team to filter discrepancies and validate rate applications, ensuring high data integrity before customer invoicing.

Student Assistant

Dec. 2025 – May 2025

University of South Florida

Tampa, FL

- Extracted and cleaned semi-structured datasets from BigQuery and SQL databases to support faculty research analytics.
- Created summary tables and visualizations in Power BI/Tableau to communicate academic trends to non-technical stakeholders.
- Authored comprehensive data dictionaries and transformation notes to ensure 100% reproducibility of analysis.

Data Analyst

Mar. 2022 – July 2024

PwC India

Hyderabad, India

- Validated and reconciled large-scale transactional datasets using SQL and Excel to support high-value audit engagements.
- Built automated reporting dashboards in Power BI, significantly reducing weekly reporting turnaround time for client teams.
- Communicated data quality issues to cross-functional stakeholders, resulting in a measurable reduction in audit exceptions.

Projects

Adversarial Malware Generation using RL | Python, PyTorch, Reinforcement Learning

Dec. 2025 – Present

- Conducting independent research to generate adversarial malware variants using Reinforcement Learning agents.
- Developing a custom environment to mutate code structures while preserving functionality, testing against industry classifiers.

Enterprise Data Warehouse Design | SQL, Snowflake, Dimensional Modeling

Aug. 2025 – Dec. 2025

- Designed a Kimball-style Star Schema for a retail dataset, implementing Fact and Dimension tables for OLAP analysis.
- Implemented Slowly Changing Dimensions (SCD Type 2) to track historical data changes and ensure accurate reporting.

Technical Skills

Languages: Python (Pandas, NumPy, Scikit-learn), SQL (Oracle, BigQuery, Postgres), R, DAX

Cloud & Databases: AWS, Google Cloud Platform (BigQuery), Snowflake, Oracle SQL Developer

Visualization & Tools: Power BI (Service, Desktop), Tableau, Advanced Excel (Power Query, Macros, Pivot Tables), Git

Certifications: Microsoft Certified: Power BI Data Analyst Associate, Microsoft Certified: DP-700, Google Cloud Professional Data Engineer
